(54) ACCESS SUPPLY DEVICE/METHOD FOR WEB INFORMATION

(57)Abstract:

PROBLEM TO BE SOLVED: To access to web system information service from a general telephone set or a cellular telephone set by accessing to a web storage place, retrieving requested information and supplying requested information to a user through the telephone set.

SOLUTION: A gateway 40 requests an appropriate HTML page from an appropriate HTTP server 52. The HTTP server 52 supplies the page and software in the gateway 40 'reads' the HTML page through an HTTP protocol software 45 and extracts a specified content related to information which the user requests. Extracted information is converted into an appropriate end user related protocol (namely, colloquial sound, alphanumeric text or combination of them) by user presentation control software 43, and is transmitted to the telephone set of the user through a public telephone exchange network (PSTN) 22.
